

Mini Project 1

*Lecturer: Srinivas Shakkottai**Scribe: Self*

1 Introduction

In this machine problem, you will build your own app. This is a mini-project, so be creative in your implementation!

2 Timeline

There are two steps in completing this project.

1. A single slide describing your app.
 - The pptx slide template is on the webpage.
 - Print your slide to pdf, and submit the pdf file on the website by 6:00 PM on Feb 21, 2019.
 - Presentation on Feb 22, 2019.
2. Your app.
 - The app requirements appear in the next section
 - Demo of app is on March 1, 2019.

3 Problem statement

Your app will need to have:

- At least 2 activities
- At least 1 item of information that is passed via an intent
- At least 2 fragments
- At least 1 ListView
- At least 2 types of file types in resources
- Support for portrait and landscape modes

4 Evaluation Guidelines

1. Check operation using the interface.
2. Creativity carries bonus points.
3. Your application must run on either a physical or a virtual device.
